1. The first step is to identify the problem.

2. The second step is to define the problem.

3. The third step is to analyze the problem.

4. The fourth step is to develop a solution.

5. The fifth step is to implement the solution.

6. The sixth step is to evaluate the solution.

7. The seventh step is to monitor the solution.

8. The eighth step is to maintain the solution.

9. The ninth step is to improve the solution.

10. The tenth step is to document the solution.

11. The eleventh step is to communicate the solution.

12. The twelfth step is to review the solution.

13. The thirteenth step is to conclude the solution.

This is your presentation
of the project results

Step 1 and Step 2 only

TERMS AND CONDITIONS

- * Advance reservations are required and are subject to program availability.
- * For reservations and information on participating hotels, just call 1-800-881-EDUC and request the "Educational" \$10 A Night offer.
- * Limit one certificate per room stay.
- * Certificate must be given at time of check in. Certificate not valid if check-out or after departure.
- * Offer applies to confirmed room rates and is valid only at participating hotels in the United States.
- * Certificate is not valid for use in combination with any other discount, promotion or special offer. Certificate cannot be applied to meetings, conventions, tours or other package plans.
- * Certificate cannot be redeemed for cash and cannot be replaced if lost or otherwise misapplied.
- * Offer expires December 31, 1989.

Friday

overbooked

overbooked

When your stay at a participating Hilton includes Saturday night at regular rates, enjoy a luxurious three days and two nights in any one of more than 150 selected Hiltons for the price of Saturday night's accommodation. No reverse side for details.

Children stay free, regardless of age, when they occupy the same room as their parents.

Offer expires December 31, 1989.

Figure 1 shows the results of the regression analysis. The dependent variable is the number of days of absence from work due to illness. The independent variables are the age, sex, and education of the respondent, the number of children in the household, the number of hours worked per week, and the number of days of absence from work due to illness in the previous year. The results show that the number of days of absence from work due to illness is positively related to the age of the respondent, the number of children in the household, and the number of days of absence from work due to illness in the previous year. The number of days of absence from work due to illness is negatively related to the sex of the respondent (female) and the number of hours worked per week. The results also show that the number of days of absence from work due to illness is positively related to the education of the respondent, but this relationship is not statistically significant.

The following table shows the results of the regression analysis for the dependent variable *Perceived Organizational Support*. The independent variables are *Organizational Commitment* and *Organizational Identification*. The table includes the regression coefficients, standard errors, and t-statistics for each variable.

Variable	Regression Coefficient	Standard Error	t-Statistic
Organizational Commitment	0.35	0.05	7.00
Organizational Identification	0.25	0.04	6.25
Constant	1.50	0.10	15.00

1. The first step is to identify the problem. In this case, the problem is that the system is not working as expected.

2. The second step is to gather information. This includes checking the logs, looking at the configuration files, and talking to the users.

3. The third step is to analyze the information. This involves looking for patterns, identifying the root cause, and determining the scope of the problem.

4. The fourth step is to develop a solution. This involves creating a plan, testing the solution, and implementing it.

5. The fifth step is to monitor the system. This involves checking the logs, looking at the configuration files, and talking to the users to ensure the problem is resolved.
